

**MUSIC**

**B [ ] X**

# What is MusicBox?

- MusicBox is a interactive web application for mixing music

# What we have achieved (1)

- User friendly interface
- 5 Sample Categories from which the user can mix music (Drums, Bass, Alarms, Melodies, Vocals)

# What we have achieved (2)

- Global Stop Button
- Play / Pause Buttons that loop music

# Problems we encountered

- Track Syncing
- Loop function not properly implemented in HTML5
- Problems with Record / Download / Share Features

# What we learned

- Hands on experience with Javascript and HTML5
- Using developing tools such as git, Atom, Sublime Text, Dreamweaver, Bluefish
- Teamwork and co-operation
- Time management and co-ordination

**Any Question?**

**Thank you!!**
